

# 3D Extruder

v1.0

## **About**

3D Extruder is an after effects script that allows you to add 3D depth to 2D layer(s) or comp(s).

Versions

3D Extruder (Free)

3D Extruder+ (Plus)

## **Installation**

Inside the downloaded script folder there are two items.

- "3D Extruder v1.0" (script file)
- "extd\_images" (images folder)

Copy these two items and paste them in the required directory below. (depending upon your O.S and after effects version).

Windows Directory:

"C:\Program Files\Adobe\Adobe After Effects <your version>\Support Files\Scripts\ScriptUI Panels"

Mac Directory:

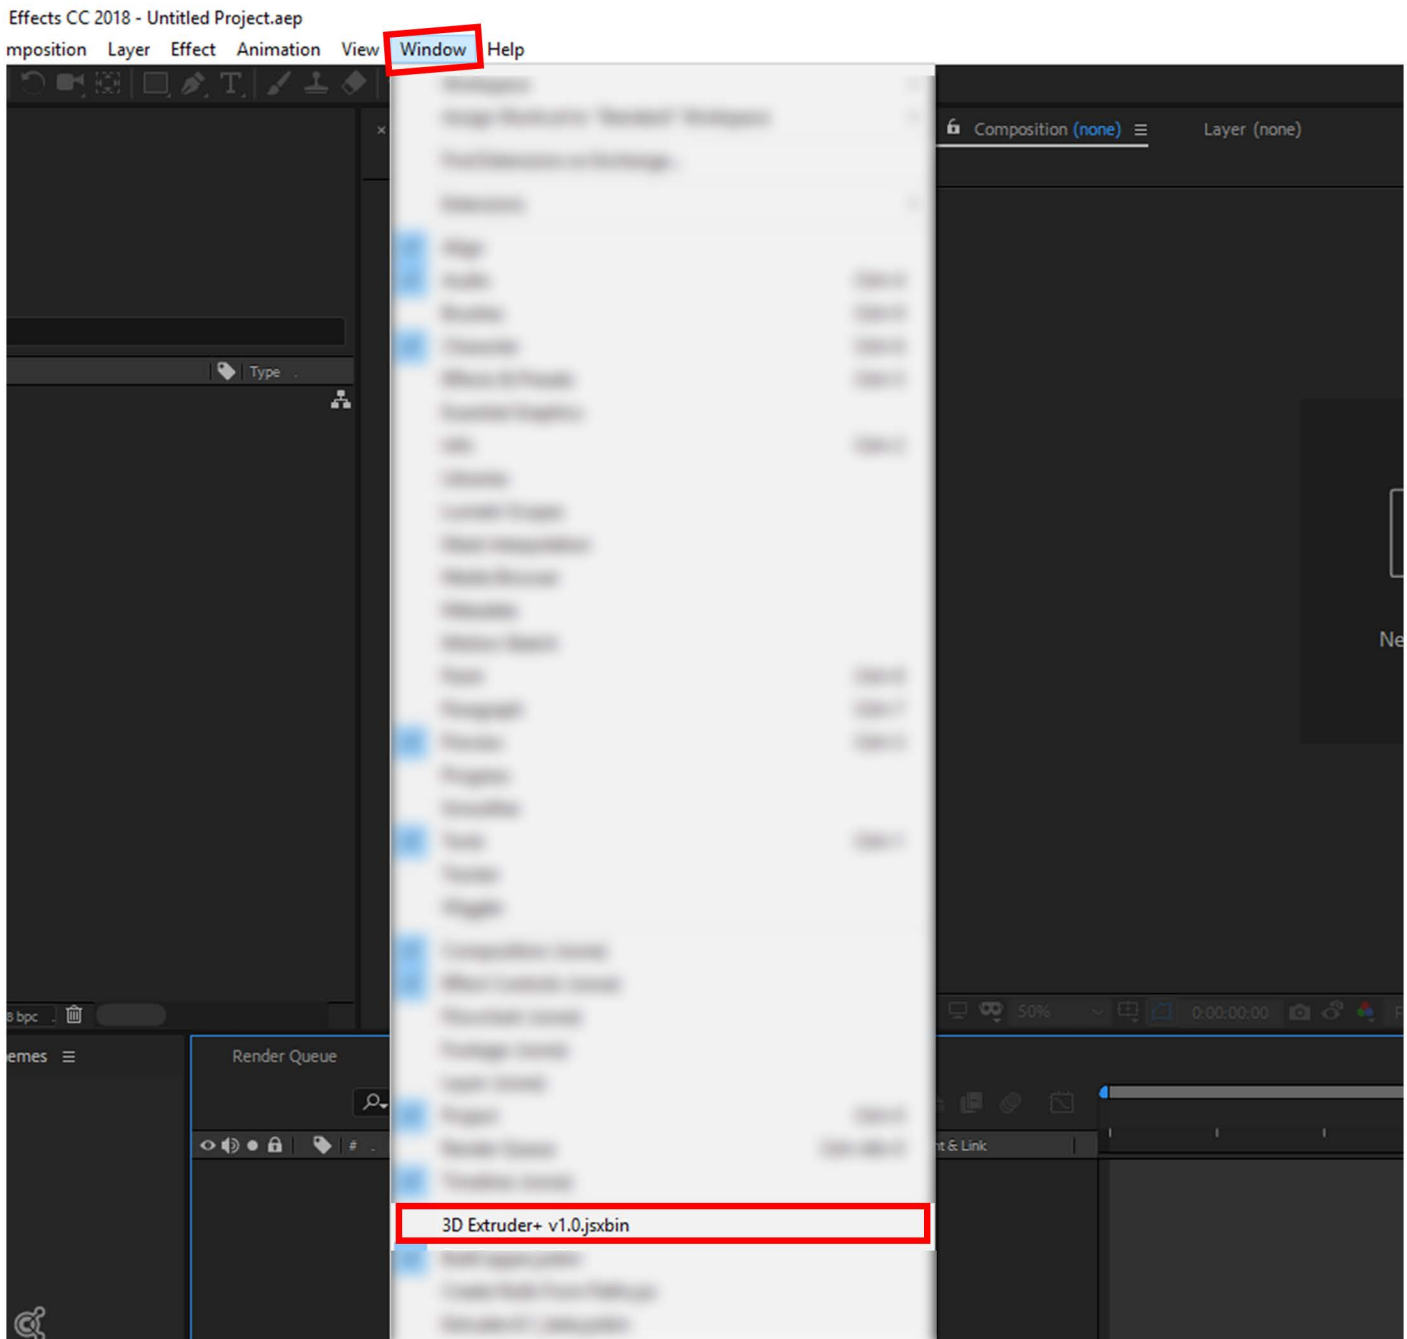

"Applications\Adobe After Effects <your version>\Scripts\ScriptUI Panels"

If "ScriptUI Panels" folder does not exists then create a folder with the name "ScriptUI Panels" and paste the downloaded script files in it.

That's it you are done with the installation.

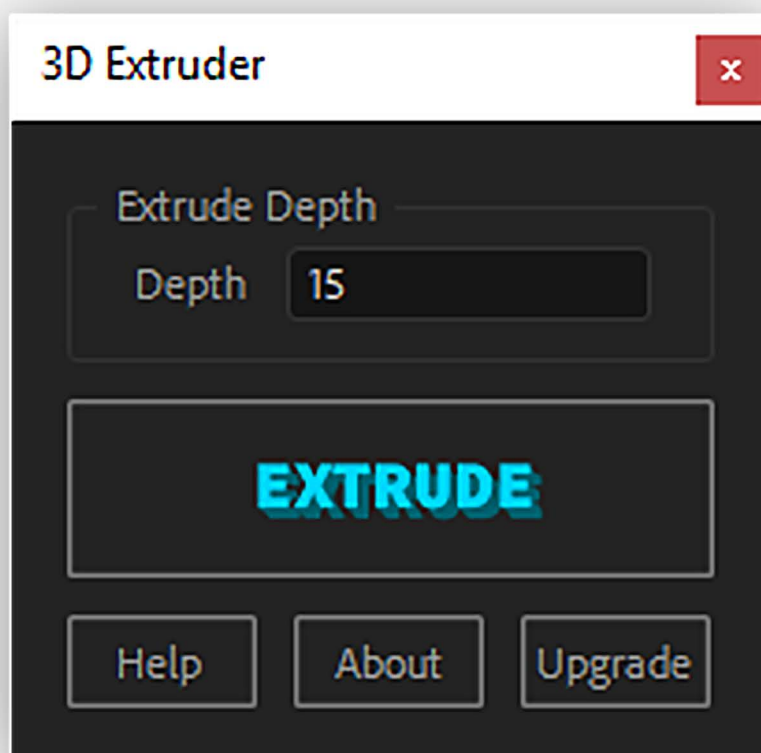

## Launch Script in After Effects

Once you have pasted the script files at right location open up After effects and goto Window menu and from the list select the "3D Extruder v1.0".

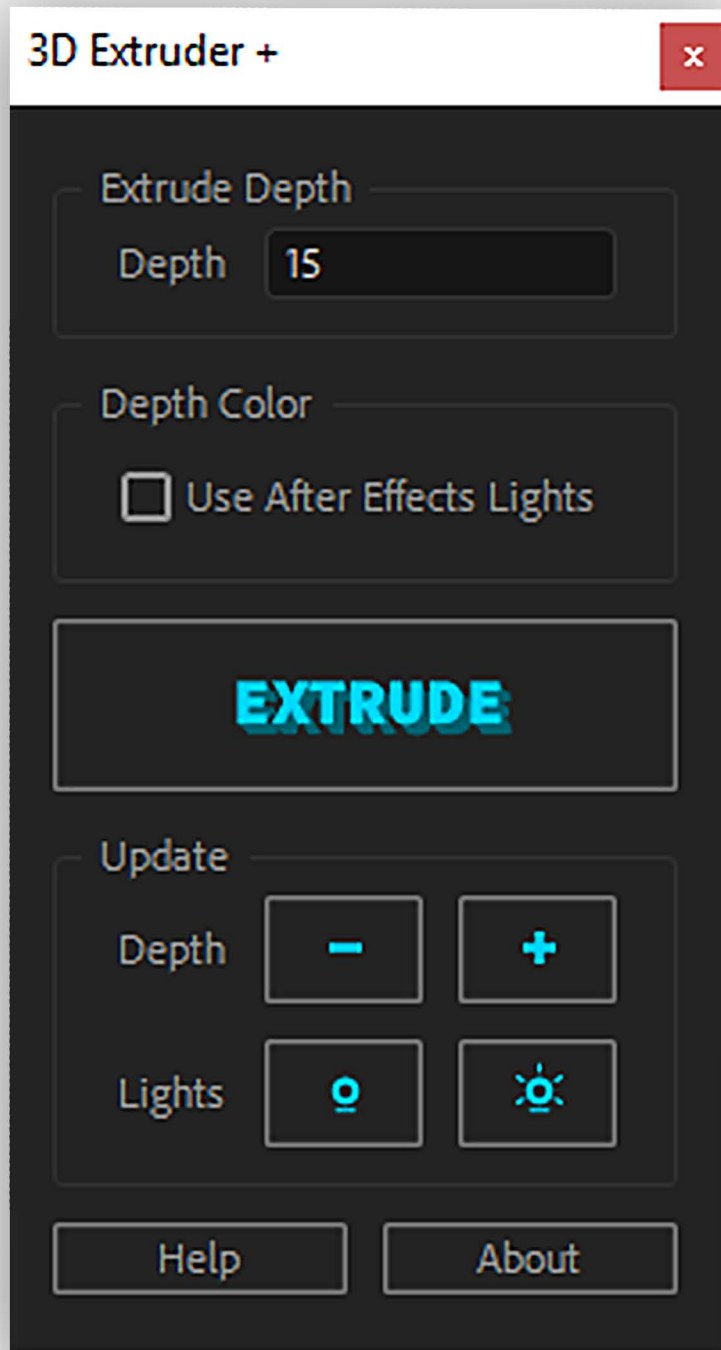

You will get a floating palette. You can arrange this palette into your After Effects Layout wherever you want.

## UI Pannel

(Free Version)

# UI Pannel

(Plus Version)

## **Usage**

[Watch the video tutorial for guide on how to use this script.]

## **Need Help?**

If you are facing any problem with the Installation or Usage of this script, then watch the video tutorial first. It has proper guide on Installation and Usage of this script.

Still need help or want to give feedback?
